

AMENDED CLAIMS

1. A protective implement comprising:
a protective tool formed with a steel wire; and
a receipt object formed in a shape of a sheath, capable of carrying and storing the protective tool into a space therein so as to wrap, having a drawing-out part, provided at a surface of the receipt object, which can reduce the frictional resistance when the protective tool is pulled out.
2. A protective implement according to claim 1, wherein the protective tool further includes a protective tool body with the steel wire and a grip part attached rotatably in an end of the protective tool body so as to be contained at an optimal state during in receipt into the receipt object body.
3. A protective implement according to claim 1, wherein the receipt object further includes a receipt object body formed in the shape of a sheath and a drawing-out part formed in the surface of the protective tool and in the shape of a slit, capable of carrying and storing the protective tool into a space therein so as to wrap, reducing a frictional resistance when the protective tool is pulled out.
4. A protective implement according to claim 1, wherein the receipt object is provided in one of a skirt part of a coat formed by cloth including jeans cloth and leather and a side part slippage of an inner side part of trousers.
